

PD Plus®

MODEL 5500 HEAVY DUTY

Model 5500 PD PLUS heavy duty industrial blowers are designed for high performance applications, up to 18 PSI pressure or 17" Hg dry vacuum (24" Hg water injected).

Bi-directional Rotation Series Options:

- › Horizontal Air Service
- › Vertical Air Service
- › Horizontal Flow, Single Envelope Gas Service
- › Vertical Flow, Single Envelope Gas Service
- › Horizontal Flow, Double Envelope Gas Service
- › Vertical Flow, Double Envelope Gas Service

Vertical & Horizontal Air Flow

This series has wide application in pneumatic conveying, wastewater treatment, and the general process industry where high pressure, high volume air is required. Seal areas are vented to atmosphere to relieve process pressure against the internal lip seals and to provide oil-free air.

Vertical & Horizontal Single Envelope Gas Service

This series is utilized in such applications as closed loop pneumatic conveying, process gas handling, and elevated pressure applications up to 100 PSIG discharge. Vent openings are tapped and plugged to prevent gas leakage. These fittings can also accept an inert gas purge for positive containment of the process gas.

Vertical & Horizontal Double Envelope Gas Service

This series is built to laboratory standards where virtually complete sealing is required. In addition to the features shown on the Single Envelope Gas Service series, the drive shaft is mechanically sealed and the oil sumps are plugged to provide an even higher degree of leakage protection.

Optional Cooling Coils

All vertical flow 5500 PD Plus models are available with cooling coils to provide cooling of lubricating oil with less than 0.5 GPM cooling water for high performance applications.

Special Materials

Stainless Steel*
 Carbon Steel**
 Ductile Iron

Special Coatings

Bi-Protec® (Nickel/Armloy®)

Model Size	Max. Press. PSI	Max. Vac. (in. Hg)	Nom. Min. RPM at Max. Disch. Pressure	Nom. Max. RPM at Max. Disch. Pressure	Displ. CFR
5507	18	17	2150	3600	.235
5511	17	17	1800	3600	.345
5514	13	15	1250	3600	.440
5518	10	15	1150	3600	.565

Material Specifications:

Housing: Cast iron **End Plates:** Cast iron

End Covers:

Gear End – Cast iron

Free End – Cast iron

Rotors: Ductile iron

Shafts: Ductile iron cast integrally with rotor

Bearings:

Gear (drive) End – Double row ball

Free (back) End – Cylindrical roller

Drive Shaft – Spherical roller

Drive Shaft: SAE 4140 forged alloy steel

Gears: Alloy steel, helical cut

Seals:

Standard – Lip and labyrinth type on rotor shafts; lip seal on the drive shaft; less than 25 PSIG

Single Envelope Gas Service – Mechanical and labyrinth type on rotor shafts; lip seal on the drive shaft; less than 25 PSIG

Double Envelope Gas Service – Same as Single Envelope Gas Service series plus mechanical sealing on the drive shaft; greater than 25 PSIG*

Lubrication: Oil splash systems, both ends

* Blowers operating with a discharge pressure above 25 PSIG require hydrostatic testing and special high pressure seal leakage testing.

Performance Tables

In conjunction with our program of continuous testing and design upgrading, all specifications are subject to change without notice. All data are approximate. Request a quotation for your specific application.

Pressure | 14.70 PSIA and 70°F Inlet
